Overview

Learn about the challenges of providing adequate healthcare to low-income populations, rural, with 68% of India's population living in rural areas. This program provides students with a unique opportunity to encounter various diseases in clinical settings that represent the rural and urban divide in a developing country. The focus will be on primary care services and public health issues, with special emphasis on the needs of rural communities in India that lack access to healthcare. This global health opportunity also offers a window into improvements made in public health, through the persistence of health camps and widespread outreach efforts. Get a crash course in Indian culture by spending 2-4 weeks in Eturnagaram, Warangal district. This clinical will take place in Eturnagaram, a rural village in South India.

Awards & Achievements

Excellence in Healthcare by Sakshi Media

First C-section in the region covering 20,000 people.

More than 100,000 patients see per year (20,000 Inpatient care provided)

Electronic Medical Record is implemented

What We Do Best

Specialties included: Surgery, General Medicine, OB/GYN, Critical care.

We conduct weekly/monthly health camps, where we see approx. 500 to 800 patients a day and do free blood works and dispense free medications. Team of different specialty doctors, nurses, lab technician, pharmacist and other axillary staff select different interior villages each time to conduct their free mega health camps and mobile clinics

"Got hands-on experience in seeing both inpatient and outpatient, good teaching lectures by Dr. Manjeera. And was fortunate to see a diverse set of patients as well diseases"-Dr. Saritha Katta, Medical student, MUA - Medical University of America. **Kyles Testimony** 3rd testimony
